

# THE ORIGINAL MODERN TEXTILE ART & DECORATIVE SOUND ABSORBING ACOUSTIC PANELS

## "THE WINTER IN MY GARDEN NO2"

The 2<sup>nd</sup> part of the triptych "Rescue the Garden Eden"

| Katarzyna Dietrych-Kuzak | 40" x 55" | 100 x 140 cm | own technique | 100% recycled natural and synthetic yarns | 2019 |

This fiber art was shown at the Group exhibition "Garden of Eden" at Neuhaus Castle during the conference of the European Textile Network (ETN) Textile Center Haslach in Austria.

## Inspiration

I want to tell about my Garden of Eden. I live in a raw climate, near the Beskid Mountains. This is my Garden of Eden, quiet and peaceful.

Unfortunately the degradation and the destruction of the environment is also present here.

My Garden, more and more, looks like a muffled while a long Winter.

Sometimes I feel that my Garden is dying.

Responding to the challenge "The Garden of Eden" with care for "My Garden" and all our World, as a demonstration I only used on processed fibers, during created this Textile Art.

My fiber is 100% from upcycling. The fibers come from the recycling of clothing. My friends provided me with old sweaters and scarves, which they wrapped around during long winters.

Unraveling wool was awful. But it was worth it. I choose the simple way to show the problem. Sustainable art & Knitting. I change the old clothes for new art.

I hope that this Textile Art although a bit warm our Garden of Eden.

So, I think today's Textile Artist should focus on the recycled fibers, Only then production of new things (including new works of art) is not pointless.

## Elimination of unwanted sound with Textile Art created by Katarzyna Dietrych:

### In which interiors Panels will look and work the best?

Especially there when need improve the sound, muffle and absorb sounds. Or there, where you need help with reverbs that are a common problem in modern interior design, especially in modern offices.

The Panels perfectly apply in representative interiors /headmaster's office, lobby, hall, reception, relaxation room and private interior/.

### What can you say about this product as the Fiber Art?

It is the perfect blend of minimalist style and richness of a subtle play of lights and shadows.

The quiet cold and soft tonal taint of colors in a narrow range gives calming effect.

Variety arrangements textures and patterns and the Earth tone colors create a fantastic abstract composition. The compositions of the Textile Arts are very minimalistic, in the layout and way of expression.

**What are the additional advantages of this textile art?**

As an artist and a fan of comfortable minimalist interior design, Katarzyna combines the quality of Acoustic Panel as a utility item with high quality Abstract Textile Art as a modern fine art in one object. Each Panel is unique and inimitable. It gives the interior a luxurious and a spectacular style.

**What is this sound panels made of?**

The natural and synthetic fiber yarns what an Artist use in this work mostly come from recycled clothes and natural pure wool from a small nearby sheep farm. Incidentally wool is one of the most sustainable fibers on the planet. At the end of its use, wool biodegrades and adds nutrients back into the soil or the ocean.

The Art and an idea of reuse of yarn was recognised on a few world important competitions of Fiber Art and appreciated by highly sustainable People, who preserve the Earth's precious resources.

They especially appreciated the sound quality and aesthetics of Textile Art Acoustic Panels made without plastic.

**How do the Artistic Acoustic Panels work?**

They act as a giant sonic catcher, soaking up unwanted noise and echo inside your space creating a more comfortable sounding environment. Remember that the Acoustic Panels are sound absorbing panels, not soundproofing panels. For a larger area and for a bigger impact Textile Art can also hang next to each other. The proprietary Acoustic Textile Art provides sound absorption thanks to the soft and rich in detail surface made of fiber.

**What sizes are available or you can order?**

This soundbar measures 40" x 55" | 100 x 140 cm

But you can also order other panels in standard sizes.

Standard dimensions: W20 x H20 x 5 cm to W140 x H100 x D5 cm

/ W8 x H8 x D2 in to W40 x H55 x D2 in, or more on the special request.

**How to buy Acoustic Art Panels?**

Please contact with the artist directly. You can order Textile Art Acoustic Panel especially personalized for you (color, size, etc), or buy one of the available Textile Art.

**How to maintenance of Textile Art Panels?**

Vacuum, wipe with a damp cloth or wash at low temperatures. Detailed instructions for each panel included.

**What will you get extra?**

You will have an authentic high quality of Fine Art, impossible to forge. At customer's request without auth extra pay, the Artist chooses the most suitable Panel for Your Interior (design, color, size, etc), and at the end chooses the appropriate lighting and exhibiting in the interior.

Everyone has a certificate of authenticity: created by the Artist himself, one of a kind piece of art.
